Summary

Software Engineering student with a product-first mindset and deep passion for leveraging technology to solve real-world problems at scale. Experienced in building production-style full-stack systems (Java/Spring Boot, Node.js) and data-driven ML pipelines. Thrives in fast-paced startup environments with a bias for action, owning features end-to-end—from design to deployment. Keenly interested in building scalable, high-impact platforms that empower millions of users, aligning perfectly with WorkIndia's mission to revolutionize blue-collar hiring in India.

Technical Skills

Languages: Java, C++, Python, JavaScript, SQL, Go (familiar)
Backend & Web: Spring Boot, Hibernate/JPA, Node.js, Express.js, FastAPI, React.js, HTML5, CSS3, REST APIs
Databases: PostgreSQL, MySQL, MongoDB (familiar)
Data Science / ML: NumPy, Pandas, Scikit-learn, XGBoost, OpenCV, Matplotlib
Tools & Platforms: Git, GitHub, Docker, Kubernetes (basics), Google Colab

Projects

CampusHire – Full-Stack Job Portal | *Java, Spring Boot, Hibernate, MySQL, REST API* Sep 2025 – Feb 2026

- Owned the end-to-end product lifecycle for a job-matching platform, architecting the database schema and REST APIs that onboarded 1,000+ active users (students & recruiters) within the first month
- Drove a key product metric—recruiter response time—by 40% by implementing an automated email/SMS notification pipeline
- Designed role-based access control (RBAC) and secure JWT authentication, reducing unauthorized access attempts by 95%

IPL Match Winner Prediction System | *Python, FastAPI, React.js, Scikit-learn, XGBoost* Apr 2026 – Present

- Built an ML-powered prediction platform reaching 87% accuracy on match outcomes using historical and live match data
- Engineered 20+ features and deployed a FastAPI backend powering an interactive dashboard with real-time win-probability updates

Video Anomaly Detection | *Python, Random Forest, OpenCV* Jan 2025 – Aug 2025

- Trained a Random Forest-based detector achieving 92% precision and 88% recall on live video streams
- Deployed a real-time alert pipeline with sub-200ms per-frame latency

Attendance using Face Recognition | *Python, OpenCV, Pandas* Feb 2024 – Jun 2024

- Engineered a real-time face-recognition attendance system achieving 95% accuracy across 200+ test faces
- Cut manual attendance entry time by 40% by integrating directly with the existing database

Leadership & Initiatives

Completed the IPL Prediction platform; planning, code reviews

Core Member in the workshop team and Event Mangment Teams Collaborated in team-based academic projects

Improving leadership and communication skills

Consistently practice Data Structures Algorithms and problem-solving on coding platforms

Education

Vellore Institute of Technology Bhopal, MP
B.Tech in Computer Science; CGPA: 8.55 *Aug 2023 – May 2027*
Kendriya Vidyalaya No.1 Arakkonam Tamil Nadu
Senior Secondary (12th) *Aug 2022 – May 2023*
Kendriya Vidyalaya, Ghazipur Uttar Pradesh
High School (10th); Percentage: 94.8% *Aug 2021 – May 2022*

Certifications

Data Visualization: Empowering Business with Effective Insights (Certificate of Completion)

NPTEL Certified in Cloud Computing (Elite + Silver)

Python for Data Science – NPTEL (ongoing, enrolled)

SQL for Data Analysis – UC Davis (Coursera)

Machine Learning Specialization – Stanford Online (Coursera – in progress)
